

Hello Town and Country Recreational Soccer families!

ANNOUNCEMENT

We are very excited to announce PlayMetrics, our new all in one registration and communications software platform. PlayMetrics reduces the applications you use to interact and communicate with our club and your teams. Using the PlayMetrics app on your mobile phone, you can now register and communicate with us, taking our club communication and organization to the next level.

WHAT TO DO NEXT

Please click the registration link below and follow the instructions provided to create an account. Next, verify your email and add your players to your account. Once you've added players, you can register for Spring 2026 Rec Soccer.

[Click here for a quick video tutorial.](#)

DOCUMENT & PHOTO REQUIREMENTS

As part of the registration process in PlayMetrics, you will be required to upload:

- A clear picture of your child's birth certificate or a photo of a passport.
- A passport-style photo of your child (straightforward head-and-shoulders, no sunglasses, no hats, and no other people in the photo).

The birth certificate (or passport) will only be collected once and will not be required for future registrations. Player photos will need to be updated every two years to ensure an accurate and current image on the player profile.

ACADEMY OBSERVATION OPTION AT REGISTRATION

During registration, some players will see an "Academy Observation" option based on their age group. You are welcome to select this option and sign up for an academy observation, but please note that team placement in the academy is not guaranteed. If you are interested in the academy, it is recommended that you register for recreational soccer first. If your player is later accepted into the academy, your recreational registration fees will be transferred to your academy registration so that you do not pay twice.

HELP USING PLAYMETRICS

As you begin using PlayMetrics, you may have questions about how to navigate your account. The Help articles below offer instructions as you start using the system.

BENEFITS TO YOU

PlayMetrics allows you to register and communicate with your teams all in one place whether at home or on the go. It helps us communicate with all of our families more clearly and effectively, including updates to practice schedules and field closures as they happen. The PlayMetrics platform ensures that you are always in sync with your team and never out of the loop.

If you have any questions that aren't answered here please email our Recreational Soccer Director Dan Rawlinson at drawlinson@tandcsports.org.

See you on the fields,

Dan
